The Aspergillus Site

An extensive scientific site by the Fungal Research Trust, United Kingdom, including research and educational (information, slides, video, images) on the topic of Aspergillus and the diseases it causes, with the latest advances in treatment.

http://www.aspergillus.org.uk/indexhome.htm?homepagenew/mainindex.htm~main

an extensive scientific site with information related to Aspergillus infections

From the Introductory Page:

Welcome to our home page...

This site offers a wide range of information about the fungus Aspergillus and the diseases it causes. It is designed to provide information for clinicians, scientists, patients and their relatives. There is a section devoted to the needs of patients suffering from the effects of Aspergillus and links to the Aspergillus Trust.

On the site you will find:

• diagnostic and research laboratory protocols

• treatment and antifungal drug information

• articles of interest

• actual case histories

• relevant conference and course details

• abstracts from conferences

• a large image library (more than 400 clinical photos, scans and different.species of Aspergillus) and videos

• information on Aspergillus genomics

• clinical and laboratory discussion forums

• a current and historical bibliographic database,

• news about Aspergillus

• mycotoxin and Aspergillus species information

• veterinary diseases caused by Aspergillus.

There is also a section providing free educational materials. And slides sets for teaching purposes.

Parts of the site require registration (free of charge), and you can select whether to add your e-mail address and FAX number to others in the address book.

Only the web managers have access to this database.

Registered users can login now.

Sponsors : The Aspergillus site is co-sponsored by Schering-Plough, Pfizer Inc, The CGD Research Trust and most recently by The Moulton Trust. We are grateful to our previous sponsors Alza, OrthoBiotech, Merck & Co Inc., and AB Biodisk for their support.

The recommendations given, aim to be a guide, but should not be viewed as definitive, especially with regard to clinical and treatment information. The content of this site is ultimately the responsibility of the Fungal Research Trust and is independent of any sponsor.
